No reference image: this prompt ran on its own.

Create a 30-second fast-paced photoreal cinematic vertical 9:16 cooking film showing the preparation of authentic katsudon. Real food, real hands, real Japanese kitchen, shot like a high-end macro food commercial. The cutlet always lies flat, low in the tall frame, warm kitchen above it. Not animated.

STYLE

Photoreal, cinematic summer lighting, ultra-detailed food textures, realistic cooking physics, visible steam and moisture, shallow depth of field, macro close-ups, smooth camera movement, warm Japanese kitchen atmosphere. Fast rhythmic editing with natural match cuts based on movement, shape, texture, and composition.

TIMELINE

0-2.5s - Prepare Pork
Close-up of hands pounding a thick pork loin with a wooden mallet on a cutting board. The meat gradually flattens and its fibers loosen. Sprinkle salt and pepper evenly. Crisp rhythmic impacts.

2.5-5s - Bread the Pork
Quick match cuts: press the pork into flour, dip into beaten egg, then firmly coat with coarse panko breadcrumbs. Show realistic egg dripping and breadcrumbs adhering to the surface.

5-7.5s - Fry
A wire skimmer in a hand lowers the breaded pork flat into hot golden oil. Intense bubbling surrounds the cutlet as the crust turns golden brown and crispy. Warm cinematic lighting and detailed oil movement.

7.5-11s - Slice
The fried tonkatsu lies flat on a wooden board, framed wide enough for the whole knife and the hand on its handle. One continuous shot, no edit: the blade comes down across the short side of the cutlet and cuts through it, then again a finger-width along, then again, until a row of even strips lies in the cutlet's shape, gaps showing. The crispy crust cracks naturally, revealing juicy white pork with gentle steam escaping.

11-12.5s - Simmer Dashi & Onion
Thin half-moon onion slices gently simmer in amber dashi

inside a shallow pan. Small bubbles rise while the onions become translucent. Chopsticks in a hand gently move them through the broth.

12.5-14s - Add Tonkatsu
A hand with chopsticks eases the sliced tonkatsu, still in its row of strips, over the simmering onions. The broth begins soaking into the crispy edges while steam rises.

14-16.5s - Pour Egg
A hand holds a small white bowl over the middle of the pan, bowl and hand in frame, and slowly pours beaten golden egg over the tonkatsu and onions. The egg spreads naturally through the gaps and begins setting around the hot edges.

16.5-19s - Set the Egg
The same egg, still lying over the strips, gently coagulates over low heat, no whole yolks. Edges become soft golden curds while the center remains glossy, slightly runny, and trembling. No stirring.

19-21s - Prepare Rice
A hand with a rice paddle fills an empty blue-and-white donburi bowl with a generous mound of steaming Japanese short-grain rice. The rice looks fluffy and slightly glossy.

21-24s - Assemble
A hand tilts the pan and carefully slides the egg-and-tonkatsu onto the rice, still sliced. The soft curdled egg settles naturally in a soft wave while dashi lightly absorbs into the rice.

24-26s - Final Close-Up
The finished katsudon rests on the counter, the bowl filling more than half the frame. Glossy egg slowly settles over the tonkatsu and rice, gently trembling. A hand lays fresh mitsuba on top. Slow cinematic push-in.

26-30s - Hero Reveal
The same blue-and-white ceramic bowl on a wooden surface,

filling more than half the frame. Soft golden egg over crispy tonkatsu strips, their edges showing, over glossy rice, topped with fresh mitsuba. Steam rises as the camera slowly arcs around the bowl. A hand brings chopsticks in and lifts one strip, soft egg hanging off it and grains falling. The film ends in the middle of this lift, with the camera still moving.

AUDIO

Bright 1980s-inspired Japanese city-pop instrumental, 110-120 BPM, with subtle koto and light chime percussion. Synchronize realistic ASMR cooking sounds: mallet impacts, knife slicing, frying sizzle, bubbling dashi, chopsticks, egg pouring, steam, and a soft ceramic clink.

End with one delicate wind-chime tone during the final lift.

NEGATIVE

No storyboard, reference image, sketch, panels, borders, numbers, arrows, annotations, subtitles, captions, UI, logos, or text overlays. No unrelated ingredients or dishes. Katsudon only. Keep the food, hands, utensils, lighting, and environment visually consistent throughout.
