No reference image: this prompt ran on its own.

Create a 30-second fast-paced photoreal cinematic vertical 9:16 cooking film showing the preparation of authentic katsudon. Real food, real hands, real Japanese kitchen, shot like a high-end macro food commercial. The cutlet always lies flat, low in the tall frame, warm kitchen above it. The breadcrumb crust is the thing to watch in every shot. Not animated.

STYLE

Photoreal, cinematic summer lighting, ultra-detailed food textures, realistic cooking physics, visible steam and moisture, shallow depth of field, smooth camera movement. Fast rhythmic editing with natural match cuts.

TIMELINE

0-2.5s - Prepare Pork
Close-up of hands pounding a thick pork loin, flecked with salt and pepper, with a wooden mallet on a cutting board. The mallet is already falling in the first frame. The meat flattens.

2.5-5s - Bread the Pork
Three quick match cuts, one move each: a hand presses the pork into flour; dips it into beaten egg, egg dripping; presses it firmly into coarse panko, breadcrumbs adhering in a thick rough coat.

5-7.5s - Fry
A wire skimmer in a hand lowers the breaded pork flat into hot golden oil. Intense bubbling surrounds the cutlet as the crust turns golden brown and crispy.

7.5-11s - Slice
The fried tonkatsu lies flat on a wooden board, framed wide enough for the whole knife and the hand on its handle. One continuous shot, no edit: the blade comes down across the short side of the cutlet and cuts through it, then again a finger-width along, then again, until a row of even strips lies in the cutlet's shape, gaps showing. The crispy crust cracks naturally, revealing juicy white pork.

11-12.5s - Simmer Dashi & Onion
Thin half-moon onion slices gently simmer in amber dashi inside a shallow pan. The onions turn translucent. Chopsticks in a hand gently move them through the broth.

12.5-14s - Add Tonkatsu
A hand with chopsticks eases the sliced tonkatsu, still in its

row of strips, over the simmering onions. Broth climbs only the lower edge of the strips while their tops stay dry and golden.

14-16.5s - Pour Egg
A hand holds a small white bowl over the middle of the pan, bowl and hand in frame, and slowly pours beaten golden egg down the center of the strips. The egg spreads through the gaps, the strips' crust ends still showing.

16.5-18.5s - Set the Egg
The same egg, still lying over the strips, gently coagulates over low heat, no whole yolks. Edges become soft golden curds while the center remains glossy and trembling. Rough crust ends break its surface. No stirring.

18.5-20.5s - Prepare Rice
A hand with a rice paddle fills an empty blue-and-white donburi bowl with a generous mound of steaming Japanese short-grain rice.

20.5-23.5s - Assemble
Only a forearm enters, from the frame's edge. The hand tilts the pan and carefully slides the egg-and-tonkatsu onto the rice, still sliced. The soft egg settles in a wave.

23.5-25.5s - Final Close-Up
The finished katsudon rests on the counter, the bowl filling more than half the frame, crust ends showing through the glossy egg. A hand lays fresh mitsuba on top. Slow push-in.

25.5-30s - Hero Reveal
The same blue-and-white ceramic bowl on a wooden surface, filling more than half the frame, same camera axis, still pushing in slowly. Soft golden egg over tonkatsu strips over glossy rice, topped with fresh mitsuba. Steam rises. One continuous shot, one action: a hand brings chopsticks in and slowly lifts one strip toward the lens, the hand dipping slightly under its weight, then rising again. Soft egg hangs off it and

grains fall, and the top of the strip shows rough golden crust, still crisp. The film ends in the middle of this lift, with the camera still moving.

AUDIO

Bright 1980s-inspired Japanese city-pop instrumental, 110-120 BPM, with subtle koto. Synchronize realistic ASMR cooking sounds: mallet, knife, sizzle, bubbling dashi, egg pour, soft ceramic clink. The slice's crust crack is the loudest sound. Music thins under the egg pour and returns at the lift, with one small crisp crunch as the chopsticks close.

End with one delicate wind-chime tone during the final lift.

NEGATIVE

No storyboard, reference image, sketch, panels, borders, numbers, arrows, annotations, subtitles, captions, UI, logos, or text overlays. Katsudon only. Keep the food, hands, utensils, lighting, and environment visually consistent throughout.
