---

Create a 30-second fast-paced cinematic Japanese anime cooking video showing the preparation of authentic katsudon, entirely from the text description below.

IMPORTANT: Do not display, recreate, trace, reference, or imitate any storyboard, sketch, reference image, panel, annotation, or source material. Generate only original anime-style animation.

STYLE

High-quality Japanese anime film style, cinematic summer lighting, ultra-detailed food textures, realistic cooking physics, visible steam and moisture, shallow depth of field, macro close-ups, smooth camera movement, warm Japanese kitchen atmosphere. Fast rhythmic editing with natural match cuts based on movement, shape, texture, and composition.

TIMELINE

0–2.5s — Prepare Pork
Close-up of hands pounding a thick pork loin with a wooden mallet on a cutting board. The meat gradually flattens and its fibers loosen. Sprinkle salt and pepper evenly. Crisp rhythmic impacts.

2.5–5s — Bread the Pork
Quick match cuts: press the pork into flour, dip into beaten egg, then firmly coat with coarse panko breadcrumbs. Show realistic egg dripping and breadcrumbs adhering to the surface.

5–7.5s — Fry
Lower the breaded pork into hot golden oil. Intense bubbling surrounds the cutlet as the crust turns golden brown and crispy. Warm cinematic lighting and detailed oil movement.

7.5–9.5s — Slice
Place the fried tonkatsu on a wooden board. A sharp knife cuts it into even strips. The crispy crust cracks naturally, revealing juicy white pork with gentle steam escaping.

9.5–12s — Simmer Dashi & Onion
Thinly sliced onions gently simmer in amber dashi inside a shallow pan. Small bubbles rise while the onions become translucent. Chopsticks gently move them through the broth.

12–14s — Add Tonkatsu
Place the sliced tonkatsu carefully over the simmering onions using chopsticks. The broth begins soaking into the crispy edges while steam rises.

14–16.5s — Pour Egg
Slowly pour beaten golden egg over the tonkatsu and onions. The egg spreads naturally through the gaps and begins setting around the hot edges.

16.5–19s — Set the Egg
Close-up of the egg gently coagulating over low heat. Edges

become soft and golden while the center remains glossy, slightly runny, and trembling. No stirring.

19–21s — Prepare Rice
A white ceramic donburi bowl receives a generous mound of steaming Japanese short-grain rice. The rice looks fluffy and slightly glossy.

21–24s — Assemble
Carefully slide the egg-and-tonkatsu mixture from the pan onto the rice. The egg settles naturally in a soft wave while dashi lightly absorbs into the rice.

24–26s — Final Close-Up
The finished katsudon rests on the counter. Glossy egg slowly settles over the tonkatsu and rice, gently trembling. Slow cinematic push-in.

26–30s — Hero Reveal
Present the finished katsudon in a traditional blue-and-white ceramic bowl on a wooden surface. Golden egg covers crispy tonkatsu over glossy rice, topped with fresh mitsuba. Steam rises as the camera slowly arcs around the bowl for a beautiful anime-food-film ending.

AUDIO

Bright 1980s-inspired Japanese city-pop instrumental, 110–120 BPM, with subtle koto and light chime percussion. Synchronize realistic ASMR cooking sounds: mallet impacts, knife slicing, frying sizzle, bubbling dashi, chopsticks, egg pouring, steam, and a soft ceramic clink.

End with one delicate wind-chime tone during the final reveal.

NEGATIVE

No storyboard, reference image, sketch, panels, borders, numbers, arrows, annotations, subtitles, captions, UI, logos,

or text overlays. No unrelated ingredients or dishes. Katsudon only. Keep the food, hands, utensils, lighting, and environment visually consistent throughout.
