PREMISE: A fictional arena game with no weapons, set on an invented map called the Saltworks. One player in orange is the last of her team, four rivals in teal remain, and she carries a lantern that fires a ring of light which turns rivals to glass. Original game, map and characters. No claim that this is a real match, result or product.

=====VIDEO PROMPT=====
[CAMERA LAW, the one rule that overrides everything]
Vertical 9:16 recording of a third-person arena game, captured straight from the screen, real-time game rendering.

One continuous player-controlled take. The camera stays directly behind and slightly above the player at all times, 3 metres back, her whole body in the lower-middle of the frame, filling about one third of the frame height.
NEVER a side view. NEVER a front view of her face. NEVER a cut, an orbit, a cinematic close-up, slow motion, a replay, a kill-cam or a zoom. The camera turns only when she turns.

[LOCKED PLAYER]
One adult woman seen from behind: rust-orange flight suit, round white helmet, short white backpack with a single orange stripe. In her right hand a small brass lantern on a short handle, glowing white. Same suit, helmet, backpack and lantern in every moment. She never stops moving.

[LOCKED RIVALS]
Exactly 4 rivals, all identical: teal armoured suits, smooth black visors, empty hands. No guns, blades or weapons of any kind exist in this game. Rivals only sprint and leap at her.

[LOCKED MAP: THE SALTWORKS]
An invented salt refinery at sunset, built high above white salt flats. Narrow steel catwalks run forward between giant white ceramic tanks. The sun is low and ahead of the player, orange sky, long shadows toward the camera. No words, signs, logos, numbers or flags anywhere in the world.

[INTERFACE RULES]
Only three interface elements exist, flat and clean, and they contain no letters and no numbers:
- Top centre: a row of 4 small teal diamonds, one for each rival alive.
- Bottom centre: one thin white ring around a small orange dot, her health.
- Centre of the frame: one tiny white aiming dot.
They stay fixed in place, never move, never change size.
Panels 1 to 4: all three visible. Panel 5: they vanish as written.
No kill feed, no minimap, no names, no score, no timer, no subtitles.

[STATE CHANGES, each happens in one single frame with no morph or transition, each tied to one sound]
A. Rival hit by the ring: the whole rival becomes clear glass, frozen mid-pose, in one frame. Sound: one sharp high glass "tink". In that same frame one teal diamond at the top turns dark.
B. Player hit: the white health ring turns red in one frame. Sound: one deep dull thud.
C. Last rival hit: all interface elements vanish in one frame. Sound: one huge low bell strike.
The lantern's ring of light is the only thing that hits anything. Every firing is a flick of her right arm forward, a bright white ring leaving the lantern with a soft "whum", and travelling in a straight line to its target in about a quarter of a second.

[TIMELINE BY PANEL, one moving take with no cuts]
PANEL 1, 0-3s, HOOK: First frame she is already at a full sprint away from the camera along a catwalk, tanks on both sides. Rival 1 leaps onto the catwalk ahead, on the left. She flicks her right arm. Ring. State change A: glass rival, one diamond dark. She shoulders past and the glass rival topples off the left edge behind her, still falling.
PANEL 2, 3-6s: She keeps sprinting and slides under a low pipe crossing the catwalk. Rival 2 runs at her from ahead on the right. Rising from the slide she flicks her arm. Ring. State change A: two diamonds dark. She runs straight through it and the glass shatters around her into bright shards.
PANEL 3, 6-9s: Rival 3 drops from a tank top onto the right side and shoulder-charges her. Her body jolts forward. State change B: health ring red. She stumbles, stays up, and runs to the end of the catwalk, where it stops. She leaps off the end without slowing. The camera stays behind and above her as she falls.
PANEL 4, 9-12s: She is falling, arms out, the salt flats far below and rushing up, a lower catwalk coming up fast ahead. Rival 3 leaps after her and enters from the right side of the frame. She twists only her right arm back to the right and flicks. Ring. State change A: three diamonds dark. The glass

rival keeps falling beside her. Her boots hit the lower catwalk, she lands in a roll and comes straight up running, sparks at her boots.
PANEL 5, 12-15s, PAYOFF: One diamond left. Rival 4 sprints head-on at her down the narrow catwalk, the low sun behind it, filling more of the frame with each step. Neither slows. At 13 seconds she flicks her arm from arm's length. Ring. State change C: rival is glass, interface vanishes, bell strike. She does not stop. She runs into the glass rival shoulder first, it bursts into shards all around the camera, and she keeps running into the orange sun through the falling glass. The video ends while she is mid-stride and shards are still in the air. No hold, no victory pose, no end screen.

[AUDIO]
Game sound design only: her fast boots ringing on steel, breath inside the helmet, the "whum" of each ring, glass tink, shatter, thud, wind during the fall, landing clang, the single bell. No music, no voices, no commentary, no crowd.

[NON-NEGOTIABLE CHECKLIST]
1. Camera directly behind and slightly above her from first frame to last. No side view, no face, no cut.
2. Exactly 4 rivals, and each is hit once, in order.
3. Each glass change happens in one frame, not gradually.
4. Diamonds go dark one at a time, only at the moment of a hit: 4 lit, then 3, 2, 1, then gone with the rest.
5. The interface contains no letters or numbers and vanishes only in panel 5.
6. Nobody holds a gun, blade or any weapon. Only the brass lantern.
7. No words, logos, numbers or brand marks anywhere, on suits or the map.
8. She is moving in every frame, and something changes every 3 seconds.
9. The last frame is still in motion.
