ULTRA-PHOTOREALISTIC, 15 seconds, one continuous aerial shot. A scarlet superbike accelerates along a broad alpine road toward a clear bedrock ridge. Keep the camera moving 25–220 meters above the road, entirely in open valley air. Fixed sunrise ignites snow, emerald firs, crimson freight wagons, and wet black rock. Seven disasters overlap around the rider. A colossal snow avalanche pours from the upper mountain while giant firs topple inward from the opposite shoulder. Empty freight wagons tear away from an elevated railway, a frozen waterfall shatters above the road, and a ruptured penstock fires a white torrent across the route. Sections of pavement peel into the gorge while the railway's immense central span sinks over the exit. Begin in a fast diagonal pursuit, climbing into true overhead as trees, wagons, ice, and snow invade the same aerial frame. Dive to 30 meters through clear valley air: an ice slab strikes two meters beside the motorcycle while a wagon crushes the road eight meters behind and the water jet slams the

abandoned lane beside it. The rider keeps accelerating through the narrowing corridor. Sweep around the valley flank as falling trees cast moving shadows across the bike and the avalanche fills the background without hiding the vehicle. For the climax, the rider clears the descending span with one meter above the helmet while the shoulder collapses behind and a pine crashes six meters from the rear tire. Rise into a distant aerial as the motorcycle reaches the stable ridge and snow, steel, trees, and whitewater collide below. Crushing weight, chaotic overlap, continuous geography. No cuts or slow motion.
