The heading above each prompt names the tool and format it ran with.

Higgsfield, Seedance 2.0 mini, text to video, 480p, 15 s, vertical 9:16, audio on

Early-2000s DV camcorder home video, vertical 9:16, 15 seconds, ONE continuous uncut take, real-time speed. Soft standard-definition picture, grain, washed-out colours, white overcast sky, amateur handheld shake, the operator is never visible. No music, no on-screen text, no timestamp. Overcast construction site, packed dirt, rebar on pallets, a tower crane. A low plank bench in the centre of frame. ONE rusty steel I-beam, about 4 m long, hangs level from the

crane hook 6 m above the bench. Open empty ground behind the bench.
WORKERS on the bench facing the camera, all in hi-vis yellow vests and dusty jeans: A in the centre, late 40s, heavy, grey stubble, orange hard hat, holding a sandwich. B on the left, early 20s, white hard hat, thermos cup. C on the right, 30s, beard, white hard hat, plastic food box.
ROBOT: fictional adult woman, mid 20s, soft features, dark eyes, long straight near-black hair with a centre part, does not resemble any actor. Cropped teal T-shirt, high-waisted black cycling shorts, black sneakers. Her exposed waist is silver actuators and coil springs. Calm and silent; effort shows only in her arms, her waist and the ground.
0-2s: the workers eat and laugh. Worker A raises his sandwich at the camera. The robot walks along behind the bench from right to left.
2-4s: a metal ping, the chains slip off the hook, the ONE beam falls flat toward the bench. Worker B shouts "Look out!" All three workers hunch and cover their hard hats. The robot steps to the back of the bench and raises both palms.
4-8s, same framing, no cut: the beam slams into her palms and stops one metre above the workers' hats. Her sneakers sink into the dirt, the ground cracks around her feet, her waist springs compress. She holds it still, then pushes it straight back over her head; it lands flat on the empty ground behind with a huge thud and a burst of dirt.
8-11s: the workers slowly turn around on the bench. Worker C stares at her waist and says quietly, "...She just saved our lives."
11-13s: she pulls her feet out of two deep footprints and brushes rust off her palms. Worker A, holding his orange hard hat in a shaking hand, says, "...Are you hiring?"
13-15s: she tilts her head, gives one small nod and walks away left. The recording stops abruptly.
