The heading above each prompt names the tool and format it ran with.

Higgsfield, Seedance 2.0 mini, text to video, 480p, 15 s, vertical 9:16, audio on

Hyper-real macro miniature video, vertical 9:16, 15 seconds, shallow depth of field, warm kitchen morning light. A wooden kitchen table. On it, one large plain white ceramic coffee mug with no logo.
CAT: a small black kitten with glossy short fur and round green eyes, curled up asleep inside the mug.
CREW: about twenty tiny construction workers, each the height of a coffee bean, orange work overalls, yellow hard

hats, tiny tool belts.
0-3s, close: a jagged fist-sized hole is broken out of the side of the white mug. Through the hole we see the black kitten asleep inside. Ceramic chips lie on the table.
3-5s, low macro angle along the tabletop: the tiny crew in orange marches in from the right in a line, pushing a tiny wheelbarrow and carrying a tiny ladder.
5-12s, ONE unbroken slow push-in toward the hole, no cuts: the tiny workers bolt up a scaffold of thin metal poles against the mug, stretch a square of wire mesh over the hole, trowel grey cement onto the mesh, smooth it flat with tiny floats, then brush on white glaze until the patch shines and the mug looks brand new. The kitten sleeps through all of it.
CUT TO 12-15s, medium: the restored white mug with no visible crack. The tiny crew stands in a row in front of it. The black kitten's head pops up out of the top of the mug, it yawns and says "Mew." All twenty tiny workers salute at once.
Sound: tiny hammer taps, scraping trowels, a tiny whistle, kitten breathing, one small "mew". No music, no on-screen text.
