PREMISE: An Indian housing society takes delivery of a gaming chair the size of a small house, and everybody treats it as routine paperwork. The society secretary rides off on his scooter, not knowing the rope on his rack is tied to the only wedge holding the chair. The man sitting in it never looks up from his game. Filmed by a neighbour from a balcony.

=====VIDEO PROMPT=====
[STYLE AND CAMERA]
Raw vertical phone video filmed by a neighbour from a third-floor balcony. One continuous uncut take from the first frame

to the last, no cuts of any kind. The phone stays on the balcony the whole time and never changes position. It only tilts up to follow the action and does clumsy digital zooms in and out, overshooting and hunting for focus, the way a real person does. Handheld shake, compressed phone texture, oversharpened edges. The blurred blue balcony rail stays in the bottom left corner until the zoom pushes it out of frame. Real-time speed. This is a real, mundane afternoon and nobody in it thinks it is funny.

[LOCKED SET, the first frame is exact]
A sloped concrete driveway running away from the balcony. Downhill is away from the camera, toward the top of the frame. In order going downhill:
- the giant chair on the right side of the driveway
- one yellow-and-black speed bump across the driveway
- one pyramid of exactly 10 blue water cans at the left edge
- the cream scooter on the right
- the open black steel gate, with one clothesline and 3 white bedsheets strung across it, and one wooden cart of green coconuts just inside it on the right
- the street beyond the gate
Nothing in the set moves unless something physically hits it.

[LOCKED CAST]
- THE CHAIR: a red and black gaming chair the size of a small house, five-star base, 5 black castors each the size of a car tyre, no logos, no text. Its size never changes.
- THE PLAYER: thin man, grey hoodie, black headset, seated in the chair with both hands on a black handheld console. He looks only at the console from the first frame to the last, face blank. His thumbs never stop moving.
- THE TWO DELIVERY MEN: blue shirts, standing left of the chair, both gripping the thick tan rope tied to the chair's left armrest. Faces blank and concentrating.
- THE SECRETARY: grey-haired man, white shirt, dark trousers, glasses, holding a clipboard in his left hand, standing beside the cream scooter. He stays on the scooter once he mounts it.

- THE NEIGHBOUR: never seen, only heard, holding the phone.

[WHAT THE IMAGE DOES]
The image is the first frame and locks the place, the people, their clothes, every prop and the starting framing. Begin moving on the very first frame.

[KEY TETHER]
One bright yellow rope runs from the scooter's rear rack, along the ground behind the chair, to the wooden wedge under the castor nearest the camera. It stays attached to the rack the whole time.

[TIMELINE]
0-3s [HOOK] Already moving. The two delivery men heave on the tan rope in rhythm, leaning back, and on each heave the whole chair rocks on its castors and creaks. The player bounces slightly in the seat, thumbs working. The secretary flips a page on the clipboard.
3-7s [SET-UP] The secretary tucks the clipboard under his left arm, swings a leg over the cream scooter and kicks it into life. Puff of exhaust. The phone does a clumsy zoom in toward him and back out.
7-10s [CAUSE] The scooter rolls forward toward the gate. The yellow rope lifts off the ground and snaps tight. The wooden wedge shoots out from under the castor and skips along the concrete on the end of the rope. The neighbour's voice, quietly: "Arre."
10-14s [ROLL] The chair starts to roll downhill, slowly, with enormous weight, castors grinding. The two delivery men are still holding the tan rope. They get pulled off balance and run behind it in big helpless steps, faces still blank. The phone tilts up to follow. The player does not look up.
14-17s [BUMP] The front castors hit the yellow-and-black speed bump. The whole chair jolts. With a long loud pneumatic hiss the gas lift collapses and the seat sinks about a metre in one smooth drop, carrying the player down with it. His thumbs keep moving. Neighbour, louder: "Arre arre arre!"

17-21s [CANS] The delivery men's weight drags the chair left. One castor clips the pyramid of 10 blue water cans and it bursts. The cans bounce and roll downhill, overtaking the chair, hollow plastic booming on concrete. The phone zooms in clumsily, overshoots, finds it again.
21-25s [CHASE] The chair is now rolling at running speed straight behind the scooter, filling the driveway. The secretary glances back once over his right shoulder, sees it, faces forward again and opens the throttle, expression unchanged. Neighbour, shouting: "Sharma ji! Peeche dekho!" Blue cans hit the coconut cart's wheel and green coconuts pour off it onto the ground, rolling.
25-30s [PAYOFF, still moving] The scooter shoots through the gate under the bedsheets. The chair's headrest hits the clothesline. The line stretches, the 3 white bedsheets wrap over the headrest and stream behind it like a cape, and the chair rolls straight through the gate into the street with the player still seated, thumbs moving, and the two delivery men still running behind. The phone is zoomed in, shaking hard, chasing it. Horns start up from the street. The video stops abruptly while the chair is still rolling and everything is still in motion. There is no held final moment and no frozen frame.

[DIEGETIC AUDIO]
Only sounds that exist on that balcony, recorded by a phone mic: chair creak, men's grunts, scooter kick-start and two-stroke engine, castors grinding on concrete, the long gas-lift hiss, hollow plastic cans booming, coconuts thudding, street horns, wind on the mic, and the neighbour's voice close to the mic. No background music.

[PHYSICS AND QUALITY]
The chair has real weight: slow to start, hard to stop, its whole mass rocking on bumps. Every moving object is moved by something visible. Castors stay on the ground. Water cans stay round and hollow and keep their blue colour. Hands stay on the rope and console. Faces, clothes and chair stay stable. Something visibly changes every 3 seconds. No subtitles, no on-screen text, no logos.
