Reference image used with this prompt: the character sheet below is @Image1. Save it and upload it with the prompt in your tool.

Reference binding: @Image1 is the character sheet: KAITO is the white-haired player on the left, REN the black-haired player on the right. Take their faces, hair, skin, kit and the giant mouse design. Ignore the sheet layout, poses and plain backdrop.

Camera first: low-angle tracking, 35 to 50mm, moving on every beat. Vertical 9:16: the near player fills the lower half of frame, the far player up the frame beyond the net.

STYLE as material, in every shot: digital painting, large flat colour blocks, hard-edge brush strokes, heavy painted shadows. Japanese anime duel energy. Flat painted look throughout. No text, no logos, no brand marks, no screens, no game UI.

Reference image shows both players. KAITO, light skin, white short hair, grey patchwork sports top, purple shorts. REN, dark skin, black short hair, dark grey and purple patchwork sports top, black shorts. Both 18, fictional.

PROP, the whole joke: each player swings an oversized plain matte-black gaming mouse the size of a tennis paddle. His

fingers wrap over its rounded back, palm on the hump, in one hand. Its nose points away from his wrist, and a single black cable runs from the nose, staying attached, whipping behind every swing. The flat underside faces forward and hits the ball. One glowing white ball.

MAP: an outdoor hard court on a city rooftop under a blue sky, chain-link fence around it. Anyone who runs turns first, chest and face leading. KAITO near, REN far, always facing each other, a net between them. In the opening framing KAITO faces up the frame, away from camera, and REN faces down it.

0:00 to 0:03. Ball already in the air in the first frame. KAITO swings and the flat of the mouse hits the ball. REN sprints two steps to it and his mouse sends it back.

0:03 to 0:05.5. KAITO's POV over his own right arm. The ball flies straight at the lens, growing huge. His mouse swings through frame and sends it back, wide of REN.

0:05.5 to 0:08. Across the net, camera low ahead of REN, tracking with him, face a third of the frame height, whole mouse and wrist in view. He sprints four strides towards screen-right, eyes locked on the ball. At full stretch his mouse just reaches it and lobs it back high.

0:08 to 0:11. One continuous shot, no edit. Low wide, side-on along the net, KAITO on screen-left, REN on screen-right. KAITO jumps, body arched, mouse raised overhead, cable drawn straight behind him. He smashes down. The ball hits the hard court surface on REN's side and a spiderweb crack bursts through it. KAITO lands on both feet.

0:11 to 0:15. One continuous shot, no edit. Camera low on the court surface on REN's side, just behind the crack, facing REN, the fence behind him. The ball comes off the crack low and fast, away from camera, towards REN. REN, large in frame, face a third of the frame height, dives full stretch

towards screen-right, whole mouse and wrist in view. His mouse misses the ball by a hand's width. The ball shoots past him into the chain-link fence behind him and the mesh bends around it, smoking. He lands on his chest facing camera and slides, eyes wide, turning his head over his shoulder to the ball. The film ends with REN still sliding.

Sound: driving taiko and synth score that gets faster, then a one-beat stop before the smash. Hard mouse clicks on every hit, shoe screech, cable whip, court crack, fence clang. No speech.
