No reference image: this prompt ran on its own.

Photorealistic cinematic destruction, harsh directional light with deep shadows, red-tinged atmosphere, thick atmospheric haze and dust particles throughout, ash falling like snow, 16:9 widescreen. Deep rumbling, distant explosions, howling wind, no music, no dialogue.

[00:00-00:05] Wide shot. A dark, red-tinged sky over a coastal city. Flaming asteroids crash into buildings. Structures collapse in clouds of dust and fire. The scale is overwhelming.

[00:05-00:10] Medium back shot. A lone man in tattered clothes stands on a rocky cliff edge, overlooking the destruction below. Wind blows his hair and torn fabric. Camera does a slow orbit around the figure, revealing the full panorama of the burning city behind him.

[00:10-00:15] Close-up. The man's face, covered in dust and ash. He slowly looks up toward the sky. His eyes reflect loss and determination. Camera holds on his face, then slowly

pulls back to a wide shot of the burning city with his silhouette small in the foreground. Atmospheric haze softens the distance.

Style modifiers: photorealistic destruction, volumetric dust and smoke, realistic fire physics, cinematic camera movement, dramatic natural lighting, emotional close-up, atmospheric depth, film grain, epic scale.
